The Solid & Secure Composite Door

ENDURANCE

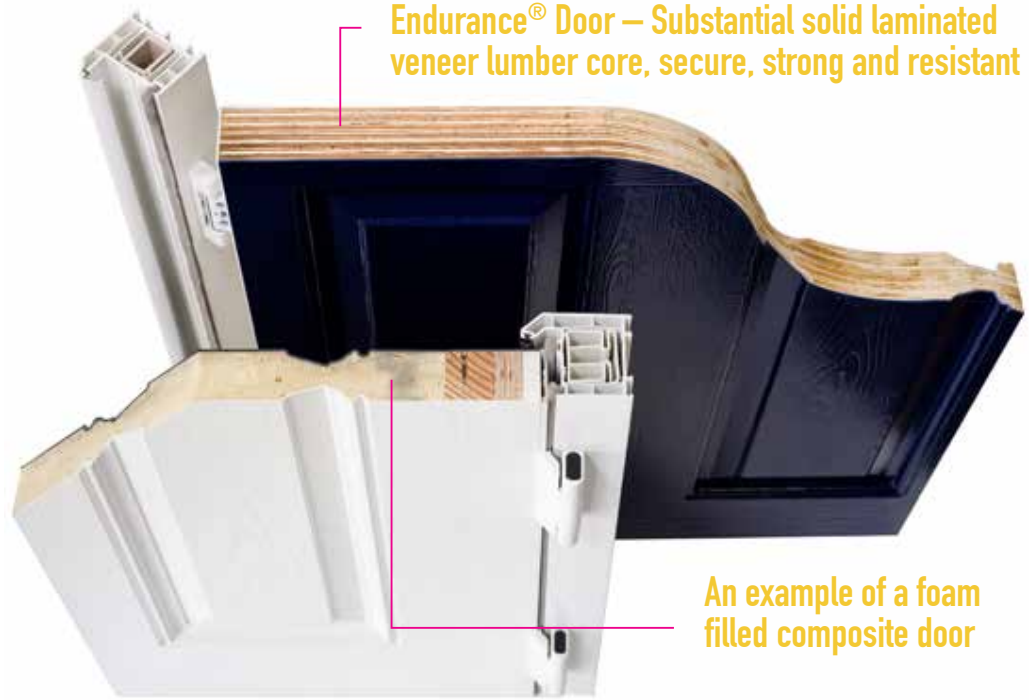
Is your home secure?
73% of household burglary is via a door
Source: Crime Survey for England and Wales, Office for National Statistics 2012/13

Inner Strength

Security

Endurance® residential doors are renowned for their strength and security, our 48mm thick cross-bonded veneered laminated solid timber core delivers unrivalled strength and dimensional stability and is a natural choice for high security, providing our home owners peace of mind. Endurance® doors are made up of 17 laminations making the door nearly 10% thicker than most composite doors.

Endurance® doors have been subjected to a number of controlled security tests to replicate the most common forms of attempted burglary. Even using a sledge hammer it would be very difficult to puncture a hole through the inner core and gain access through a Solid and Secure Endurance® door.
Please visit the Endurance® Solid and Secure website for further information.
www.enduranceddoors.co.uk



Locks

We know from our customers that peace of mind is essential. The Endurance® door standard multi point locking system with high security nickel plated steel hooks, fully penetrate the door frame keeps and help prevent the door sash and frame being forced apart. The engineered alloy sprung latch with a nickel plated steel deadbolt provides maximum strength in the centre of the door. The lock is Secured By Design accredited.
Endurance® doors can be fitted with the optional AV2 automatic multi point locking system which eliminates the need to lift the handle to engage the lock.
When the Endurance® door is closed, two solid anti-pushback hooks are automatically operated to achieve instant security. The AV2 lock is ideal for the elderly or disabled and has been Owl Mark accredited, independently assessed for the suitability of use with the aged taking into account muscle, grip and visual functions. AV2 is Secured By Design accredited.

Cylinder Guard
Endurance® doors lead the way with security upgrades. The strong metal collar gives enhanced protection to the cylinder from manipulation.

Cylinders
With all our product range, the standard cylinder has six pins, is anti-pick, anti-drill, anti-bump and has a sacrificial cut on each side. When force is applied to either end, the

cylinder will break away, leaving the remaining cylinder operational and the locking mechanism intact. However, as an upgrade we can offer a Yale Superior high security cylinder with a unique high precision 12 telescopic pin tumbler system.

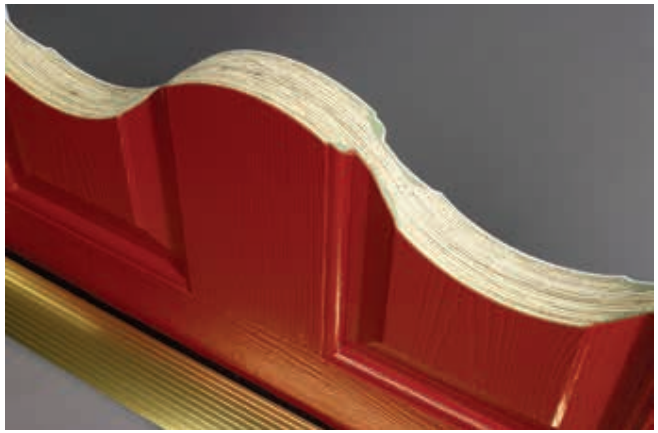
Any replacement keys may only be cut with a specially supplied registration card.

ANTI-BUMP · SAW RESISTANT · ANTI-PICK · DRILL RESISTANT · ANTI-SNAP

Yale®

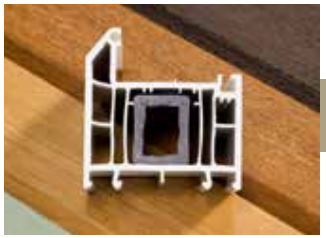
BBA accredited Kerto LVL timber core

Kerto is a laminated veneered lumber (LVL) that delivers unrivalled strength and dimensional stability. The engineered layup comprises cross-bonded veneers that enhance lateral strength and stiffness. The combinations of all the elements make it the natural choice for high security composite entrance doors. Kerto products are CE marked and certified by VTT Technical Research Centre of Finland, no 184/03.



PVC Frame

5 chamber reinforced PVCu door frame, designed to meet the requirements of the new build, commercial and domestic refurbishment markets.



Recycled rigid thermally efficient PVCu frame reinforcement

Secured by Design

Secured By Design is the official UK Police flagship initiative supporting the principles of 'designing out crime'.

The Endurance® door range has been designed, tested and achieved the standard.

The Secured By Design standard upgrade includes - Yale Superior high security cylinder, cylinder guard and laminated glass.

In order to comply with Secured By Design, the Endurance® door must be tested to PAS 24 2012.

PAS 24 2012 Enhanced Security Testing Standard produced by BSI.

The standard involves the following tests:

- A manual attack on the locking hardware with tools including a crow bar and mole grips.
- Unlimited number of 3 minute attacks on the door cylinder using a range of tools such as craft knives and screw drivers.
- 3 minute manual attack using chisels and brick bolsters to gain entry through the door.
- Hard body impact test – impacts are applied to the door leaf at hinge points and locking points using a 50kg steel impactor.

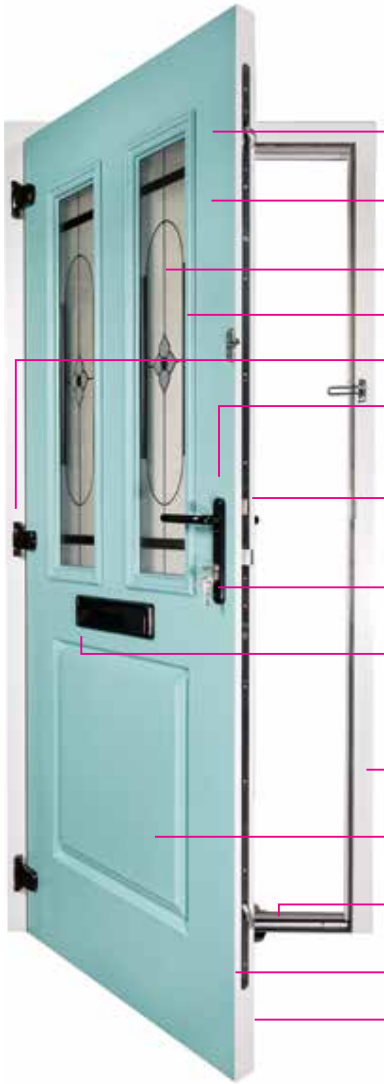
Hinges
The hinges are designed to meet the requirements of PAS 24:2012 as part of a compliant door system and BS 6375. Security of the pin is achieved by a concealed grub screw, which prevents unauthorised lift off on outward opening Endurance® doors.

Glass
Each Endurance® door is glazed with 4mm toughened safety glass double or triple glazed dependent on the glass design to BSEN1279. The sealed unit is secured into the Endurance® door using a cassette glazing system that has been independently tested

and approved to the PAS 23/24 standards.

Technical Specifications

The Endurance® door is tested and classified for its resistance to loading and impacts as well as the doors durability to repeated opening, closing and unlocking cycles, typically 50,000 times on a single door set.



48mm thick cross laminated LVL timber door leaf offers lateral strength and stability compared with most composite doors.

Tough, through colour thermoplastic door skins require no painting or varnish.

30mm thick double & triple glazed units manufactured to BSEN1279.

Cassette glazing system independently security tested.

3 door hinges designed to meet the requirements of PAS 24:2012.

Door handles are salt spray tested to 480 hours BS EN 1670: Class 5, tested to 200,000 cycles and achieves PAS24 security test as part of a complete door set.

High security multi- point locking systems that are tested to the Secured By Design specified PAS 24 security standard. Nickel plated steel hooks and dead bolt.

Standard six pin euro cylinder which is anti-pick, drill, bump and has a sacrificial cut with optional upgrade.

Letter plate conforms to the European standard EN 13724:2002, with secure through fixing ensures that they can only be removed from the inside of the house. Salt spray tested to 480 hours BS EN 1670: Class 5. Flap cycle tested to 20,000 cycles.

Heavy duty steel keeps help prevent the forcing apart of the door and frame.

Detailed embossed wood grain texture door skins, traditional look with modern technology.

Optional low aluminium threshold for ease of access for wheelchairs and prams, Part M compliant with Building Regulations.

A fully sealed door leaf with PVC edge band detail.

Weather protection drip rail.

MEMBER

Constructionline is a Public-Private Partnership between Capita and the Department for Business Innovation & Skills. Constructionline is the UK's largest register of pre-qualified contractors and consultants, helping buyers and suppliers acquire superior goods and services within the UK.

Constructionline standards are notoriously high – all suppliers are pre-qualified to the official Government standard.

The Endurance Green Promise

12 reasons why it's good to be Green

Environmental concerns and energy efficiency is core to the company ethos. We appreciate the need to act responsibly, but at the same time offer our customers new advances that 'thinking green' has to offer.

1. We are committed to do our part in helping the environment. As a company initiative we have reviewed our work systems and wherever possible **minimised our waste**, energy and utility components to manufacturing.

2. We manage an **extensive recycling programme** which covers packaging, polystyrene, cardboard, PVC-u, timber, paper, aluminium and steel.

3. All of the timbers used in our doors are harvested from forests which are managed to **meet the social, economic and ecological needs** of present and future generations.

4. The laminated veneer core is **fully environmentally accredited** which includes PEFC and full BM Trada 'Chain of Custody'. Chain of Custody certification outlines the requirements for tracking certified materials from the forest to the final product to ensure that the wood contained in the product originates from certified forest.

5. Renewable and recyclable, Kerto is a highly eco-effective door core material, throughout its life cycle. The timber is sustainably managed PEFC/FSC – certified from Finnish forests. **PEFC and FSC certification** ensures that the entire forest supply chain promotes good practice in the forest and ensures that timber products are produced with respect for the highest ecological, social and ethical standards. This includes protection of indigenous people's rights to the methods of felling trees.

6. We have linked with other likeminded suppliers to ensure that our product is as **Environmentally Green** as it can be, whilst maintaining our quality.

7. Our transport department have reviewed their schedules to ensure that **deliveries are made in the most fuel conscious manner possible**, whilst preserving our assurances on delivery times.

8. The vehicles we chose to use have a heritage of fuel economy; low-rolling-resistance tyres, start/stop, cruise control and energy recuperation. Working together, they create instant **fuel savings and lower emissions**.

9. In the manufacture of Endurance® doors we aim to source thermoplastic components and materials that contain **lead-free stabilisers** which are better for the environment.

10. The 5 chamber door outer frame PVCu profile has been **specifically designed for thermal efficiency** and is calcium organic using lead free stabilisers.

11. Endurance® door frame reinforcement is **thermally efficient and is 100% recycled**.

12. Each Endurance® door is entirely **manufactured in the UK** to minimise our carbon foot print.

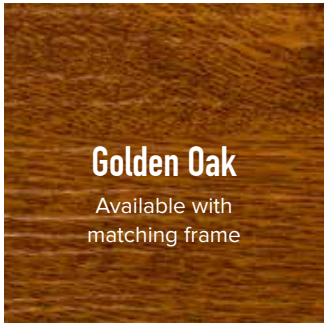
Colour Options



A Choice of 14 Door Colours

Endurance® doors are available in a choice of 14 colours, you can choose an alternative colour for the internal leaf finish. The majority of customers prefer a white internal finish however the choice is up to you.

You have a choice from the traditional Rich Red and French Navy to the more distinctive Turquoise Pastel or Pebble.

We know how the finest of detail is important to our customers, so we are able to offer a choice of 8 colours with matching door frames. These colours are available throughout our door range.

Door Furniture

To enhance the look and add the finishing touches to your Endurance® door, there is a wide choice of door hardware and security options to choose from.

Letter Plates

Antique Black | Black | Chrome | Gold

Graphite | Bronze | White

Endurance® door letter plates come in a choice of 7 colours. The 12-inch metal letter plate has an anti-snap flap which opens to 180 degrees, it meets Royal Mail standards and will easily take A4 size post and the Sunday papers. A secure through fixing ensures that the letter plate can only be removed from the inside of the house, which helps prevent burglars gaining access to the cylinder internally.

Slim Urn Knockers

Antique Black | Black | Chrome | Gold | Graphite | Bronze | White

Endurance® doors offer 2 choices of elegant door knockers in 7 colour options to perfectly match your letter plate and door handle

Urn Knockers (also available with built-in spyhole)

Antique Black | Black | Chrome | Gold | Graphite | Bronze | White

Security Spyhole Door Viewers

With a viewing range of 160 degrees you can be sure of who is on your doorstep. The security spyhole door viewer can be fitted separately or combined with an urn knocker.

Numerals

Available in a choice of 7 colours to match your door handle and letter plate

Door Security Guards

The Endurance® door security guard offers added security by preventing the door to be fully opened when greeting a stranger to your home. The security door guard is available in a chrome or brass finish

Lever Handles

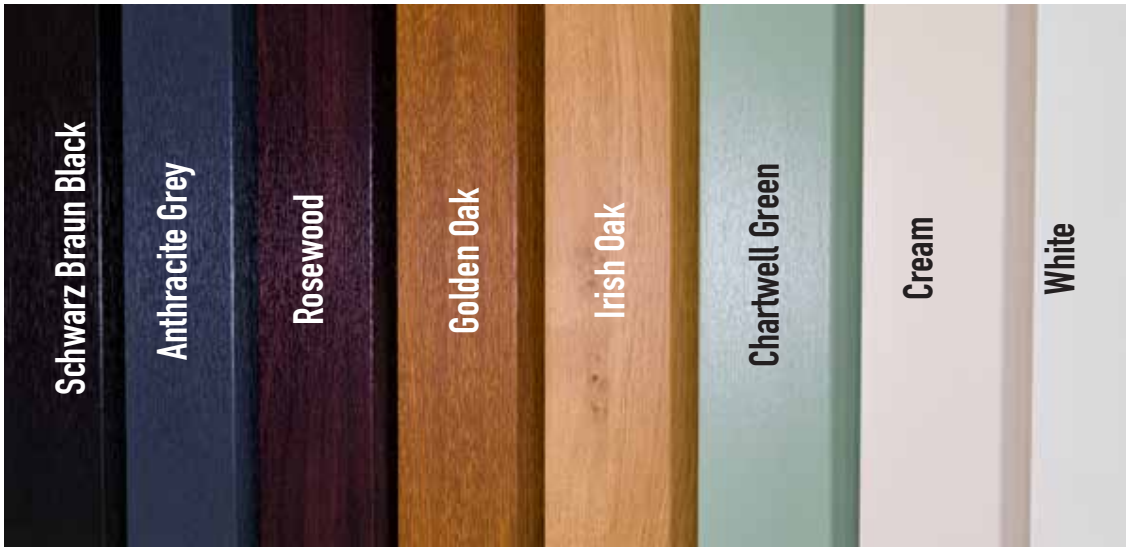
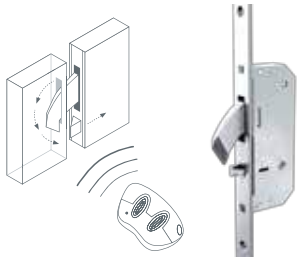
Frame Colours

Endurance® doors are available in a choice of 8 reinforced PVCu door frame colours.

Whether you wish to match your door leaf or go for a complete contrast, the choice is yours.



AV2-B Remote Security



Key-less Endurance door!

Car door remote control locking devices have been around for 25 years, the thought of having to use a key would seem rather ‘retro’!

As an upgrade, Endurance doors can be fitted with a key less remote controlled automatic high security multipoint lock.

The remote locking system operates as a slam secure lock as soon as the door is closed. Reducing the risk of follow on attacks or tailgating.

When leaving your home the lock automatically engages the locking hooks rendering the property secure from the outside. To regain entry the remote key fob is pointed at the door which allows the handle to be pushed down; this disengages the hooks and centre latch to open the door.

The remote lock is ideal for the elderly or partially sighted as it removes the need to locate the correct key into a cylinder especially in poor light conditions.

No more fumbling around for keys!

The lock requires no mains electricity supply and is operated by standard household AA batteries.

For further information contact your installer for details.

The door handles are available in our full range of colour options.

Supplied with three remote key fobs – additional fobs available on request.

The remote locking system is available for opening in doors only.

Eiger Irish Oak Georgian Bar

Tate Racing Green Olympias

Walton Rosewood Sarah

Wentwood Pebble Ornate

Traditional look with modern 3 point high security locking feature!

If you prefer to keep the traditional appearance of a Georgian or Edwardian facade but require the latest in high security multi point locking, choose our heritage high security multipoint lock option. With the heritage lock, the euro profile locking cylinder is at a similar height to a traditional round cylinder pull on traditional old doors. The lock is operated automatically as soon as the door is closed. From the inside your Endurance® door can be opened by an internal thumb turn, from the outside a key is required to gain entry.
As with all our Endurance® door lock options you can be assured of the latest in high security technology.

The Heritage security locking system is available throughout the Endurance® door range.

The escutcheon and finger pulls are available in chrome and gold finishes.

Fire Safety and High Security in One!

Endurance® doors can be supplied as an FD30 fire door option, combined with the AV2 automatic locking system your Endurance® door can offer you peace of mind for security as well as fire door protection.

The Endurance® fire door range is recommended for integral garage access into your home. Householders overlook the security of the integral garage fire door access. Most common integral fire doors have basic single locking points which are vulnerable to forced entry.

Solid & Secure Fire Safety

From the Office of National Statistics

Between 2013/14 there were 350 deaths in the UK resulting from fire

- 76% of fire-related fatalities occurred in dwelling fires
- 34% of fire-related deaths were caused by the victim being overcome by gas, smoke or toxic fumes
- 30% via burns
- 19% via a combination of burns and overcome by gas, smoke and toxic fumes
- 17% via unspecified or other

In 2012-13 there were 41,000 dwelling fires in Britain, 6% fewer than in 2011-12

- 89% of dwelling fires were accidental
- The main cause of accidental dwelling fires remains the misuse of equipment and appliances, 13,900 fires
- The main source of ignition was cooking appliances which accounted for more than half of all accidental dwelling fires

Endurance® doors are tested to BS EN 1634-1:2008, the European normative standard for fire resistance.
We can also offer Endurance® doors with side or top light vision panels to BS 476 Part22:1987 a British standard for fire resistance. The Building Regulations for England & Wales recognise both BS EN 1634-1: 2008 and BS 476 Pt. 20/22 as valid methods of test for fire resistant doors.

Endurance® doors are glazed with standard, fire rated glass units.

Choose from any of our styles of Endurance® door to offer you peace of mind against fire and crime

Yale Keyfree Locking System

Keyless Endurance doors with PIN code!

In addition to our standard key less locking system, Endurance® doors can be supplied with a Yale Keyfree locking system with the added feature of a multi – PIN console.

Allowing you to securely lock and unlock your home either by using a remote control fob or by entering your own personal code into a built-in keypad on your door handle.

To allow friends, family or even tradesmen into your home, but without handing out your front door PIN; the multi-PIN console allows you to set a temporary entrance code just for them. After which you have the control of removing the temporary codes and access!

- Illuminated key pad helps with operation in the dark.
- Batteries are concealed in the body of the internal handle.
- Built in 80 decibel alarm if the lock is attacked.
- Supplied with 2 remote key fobs , additional fobs available on request.
- The door handles are available in Chrome or Polished Gold.
